Early Career Exploration Institute

Students can apply to East Brunswick Magnet School during 8th grade to begin as freshmen. Students need at least one marking period of 8th-grade grades before applying.

Applications to the School of the Arts require an audition.

Transfer applications will be considered based on availability for current 9th and 10th-grade students. 11th-grade transfer applications will no longer be accepted.

Important: Please check your email for essential information. Be aware that emails might be sent to your Spam/Junk folder.

See below for more admission info:

Admissions Overview

Students with the approval of their parents or guardians may submit an online application to the East Brunswick Magnet School. Interested students must make an account to submit an online application. Click the following links to be redirected to:

Artificial Intelligence and Robotics Interview Required

Are you interested in exploring the world of Artificial Intelligence and Robotics? Our AI/Robotics Career Major is designed to give students hands-on experience with cutting-edge technology, problem-solving, and innovation.

This program is open only to incoming 9th graders. Students must schedule an interview as part of the application process.

If you are interested, please sign up for an interview [using this link](#).

Take the first step toward an exciting future in AI and Robotics!

The Artificial Intelligence and Robotics program at East Brunswick Magnet Schools transforms curious minds into innovative tech pioneers through an adventure. Students will breathe life into your first autonomous creations, mastering the intersection of mathematics, programming, and robotic control while your Arduino-powered inventions respond to commands. Students will learn Python, C++ and other programming languages required in artificial intelligence. Professional-grade TurtleBot3 platforms are the canvas for implementing cutting-edge machine learning algorithms, sophisticated vision systems, and intelligent behaviors that push the boundaries of what's possible. Students will build technical skills through hands-on projects that bring theory to life but also develop the visionary perspective needed to shape the future of intelligent machines. Students will be part of creating a future that launches careers through the intersection of artificial intelligence and robotics!

For any questions, please contact Ms. Brooks at brooksr@mcmsnj.net
