

Dear Parents and Guardians,

As part of our commitment to preparing students for success in their upcoming math courses, we have developed summer math assignments for certain courses. These assignments are designed to help students review key concepts and reinforce the skills they'll need at the start of the school year.

## Required Summer Math Assignments

Students who are enrolled in the following courses for the 2025–2026 school year are **required** to complete a summer assignment:

- Honors Algebra II: **Inmhavs2**
- Honors Precalculus: **wjjwzpw**
- AP Precalculus: **7eqwseyv**
- AP Calculus: **mtovc3zf**

Students should join the Google Classroom for their course using the class codes above. These assignments are intended to review essential prerequisite skills and concepts. Tutorial videos will be available to support students as they work through the material.

Please note:

- Completion of the summer assignment will count toward the student's classwork grade.
- Students will be assessed on these skills during the first week of class in September.

## Optional Summer Practice

Students entering **Algebra I College Prep, Geometry College Prep/Honors, or Algebra II College Prep** are encouraged to complete an **optional summer practice assignment**. These are not required but are recommended for students who want to refresh their skills and feel confident entering the new school year.
